

Dori Fourer

Full-Stack Software Engineer (Junior)

☎ 052-5454880 | ✉ dori.fourer654@gmail.com | 🔗 [LinkedIn](#) | [GitHub](#) | [GitLab](#)

Full-Stack Software Engineer with a strong backend and cloud foundation, experienced in building and deploying scalable web applications end-to-end. Skilled in developing REST APIs, integrating frontend interfaces, and deploying production-ready systems using modern DevOps practices.

Combines software engineering fundamentals with hands-on experience in cloud infrastructure, CI/CD, and containerized environments. Focused on writing clean, maintainable code and delivering real-world solutions.

Technical Skills:

- **Frontend:** React.js, JavaScript, HTML, CSS
- **Backend:** Python (Flask, Django), Node.js, REST APIs
- **DevOps & Cloud:** Docker, Kubernetes, AWS, GCP, CI/CD (Jenkins, GitHub Actions), Terraform
- **Databases:** MySQL
- **Observability:** Grafana, Prometheus, EFK Stack (Elasticsearch, Fluentd, Kibana).
- **Tools & Systems:** Linux, Git, Bash, Nginx

Experience:

Technical Support Representative | Bezeq

2025-Present

- Troubleshoot complex system and network issues across multiple layers (application, infrastructure, networking)
- Analyze system behavior to identify root causes and improve reliability
- Communicate technical solutions clearly to non-technical users
- Contribute to improving internal workflows and reducing resolution time

Backend Developer Intern | Bridgify

2023-2023

- Tested and validated REST APIs using Postman (including edge cases and failure scenarios)
- Improved system reliability through structured API testing and analysis
- Collaborated with development teams to identify and resolve backend issues

Projects:

Cloud-Native Microservices App ("Cat Agency") 🔗

React, Python, Kubernetes, Terraform, Jenkins

- Developed and deployed a full-stack microservices application
- Built frontend interface and integrated with backend APIs
- Implemented CI/CD pipeline to automate testing and deployment
- Designed monitoring system using Prometheus and Grafana

Drone Surveillance System - Python, Django, YOLO, RTSP 🔗

- Built a real-time video processing system using Django backend
- Integrated object detection using YOLOv8
- Streamed live video from drone via RTSP
- **Achieved high performance and received Excellence Award (99/100)**

Education & Certification:

B.Sc. in Software Engineering - SCE (2024)

DevOps BootCamp - Develoap (2025)

[Google Cloud - Professional Cloud Architect](#) (2025)

Language: Hebrew - Native, English (Professional), Russian – Basic
